De Wever (1982) proposed the new radiolarian name *Riedelius* from the Lower Jurassic of Turkey. It has been found that this name has already been used by Hudec in 1961 for a mollusc gastropod. Therefore, in accordance with Article 60 of the International Code of Zoological Nomenclature (1999), the name *Riedeliusella* nomen novum is proposed as a replacement name (type species *Riedelius williami* De Wever, 1982, p. 201; 1982, by original designation) for the preoccupied homonym *Riedelius* De Wever, 1982, non Hudec, 1961, p. 110.
